

## GUIDELINES FOR POSTER PRESENTATION

The message of the posters should be clear and understandable without oral explanation. Include a short and comprehensive review of the basic items from the study. You may divide the text into several clear sections: title, authors, introduction, methods, results, conclusions, and major references.

Format should be portrait-format, and the size of the printed posters should not exceed the following measurements of the posterwalls: Width - 80 cm/ height - 180 cm. All posters should be legible from a distance of at least 3 m, so lettering, lines and drawings should be adjusted.

### Poster set-up and dismantling

Poster numbers will be affixed to the poster board. Authors will be able to identify their assigned poster board by locating their poster number in a list to be posted onsite. Necessary material for the attachment of the poster to the board will be supplied onsite. Do not bring any other material.

The organizers have no responsibility for the displayed poster material.

### Presentation

All poster presenters will be asked to include a 3-minutes presentation with 2-minutes Q&A.

You will need to confirm this presentation.

For the oral presentation, we will have a computer and projector (Microsoft operating system) to make your poster visible for all participants. Therefore, we request you to bring a USB memory stick with your poster presentation. You may have a maximum of three PowerPoint slides, which illustrate your research. You have the option to e-mail your presentation to Jørgen Boesen [jb@boesenco.dk](mailto:jb@boesenco.dk) at least one week prior to the conference, so that there are no last-minute difficulties.

Format of all PowerPoint presentation should be 4:3 format.
